# California Proposition 65 Statement

## Introduction

Proposition 65, officially known as the California Safe Drinking Water and Toxic Enforcement Act of 1986, aims to protect California citizens from significant exposure to chemicals known to the state to cause cancer, birth defects, or reproductive harm. California Proposition 65 obligates businesses operating in California to provide clear and reasonable warnings before knowingly and intentionally exposing Californians to chemicals that are listed in Proposition 65 list.

## Compliance

To the best of our knowledge, and based upon the information available to us, some of our products contain Proposition 65 listed substances. Although these chemicals are incorporated in some of our products, there is no exposure route, such as contact with skin, being ingested with food or drink, or inhalation in the normal or foreseeable use intended. Therefore, a warning label that our products contain chemicals that may cause cancer, birth defects, or reproductive harm is not required.

People or companies intending to use MPS products for different uses, other than normal suggested product usage, may cause exposure risk to Proposition 65 chemicals if present.

## Contacts

For questions regarding MPS products, please contact your local MPS representative. For technical questions, please contact our Engineering Department at our corporate headquarters.
